About Us:

ASHOK ENGINEERING INDUSTRIES was born in 1982, out of a passion to provide its customers with reliable and durable well engineered material handling solutions.

Over the past 35 years, Team AEI has been consistently delivering top notch products for the material handling industry, catering towards , heavy equipment's Fabrication (Silos, Ducts, Vessels, Conveyors etc.), Structural Steel and Piping Fabrication. Supplier for several other allied industries. Also involved in Fabrication of Tyre Manufacturing Machines based on individual customer requirement.

We offer precise solutions for wide ranging applications in manufacturing plants and infrastructure projects through a complete range of Bale Cutting Hydraulic Press, Pneumatic Press, Chemical Tanks, Trolleys, Pickling Bins and customized heavy material handling equipment's.

Our state of the art manufacturing unit in Chennai, is one of the largest manufacturing facilities spread over 9600 Sq.ft, with 4500 Sq.ft of Machine Shop, practicing international standards of manufacturing and quality assurance. AEI is known for ensuring service excellence across its customers. With a significant presence in a few of the major players in the market, AEI is steadily marching towards becoming a brand of repute.

The Team:

Ashok Engineering Industries is established by Mr. C.T. Satheesan as a sole proprietor in technical partnership with a group of other technocrats.

Over the last 35 years, Ashok Engineering Industries has developed a strong and dedicated workforce. Since the year 1982, this team is being led by the dynamic and foresighted leader, Mr. CT. Satheesan. He brings to Ashok Engineering Industries not only engineering penchant and drive, but also the vision of customer focus and service.

Mr. CT. Satheesan is actively involved in the entire operations of the company at the top management level enabling Ashok Engineering Industries to maximize the value of its products and service offerings. He also heads the R&D cell of the company which is continuously engaged in developing newer products and components that enable Ashok Engineering Industries in maximizing the value of its product and service offerings. Under his able leadership, Ashok Engineering Industries is growing by leaps and bounds.

Mr. S. Vishnudev, the General Manager of Ashok Engineering Industries has rich and varied experience in the industry and has been instrumental in leading the business of AEI group into a high revenue generating business unit from a fledgling business. He brings on board a deep rooted understanding of the manufacturing best practices coupled with strong knowledge of the industry.

Designing team is spearheaded by Mr. R.Kumara Gurubaran
Production and Fabrication team is led by Mr. P. Vinodh Kumar., a qualified Mechanical Engineer.

Quality Assurance and Adherence is handled by Mr. Hansel Francis with a masters in Mechanical Engineering UK.

OVERVIEW

Whatever may be the type of your industry or its material handling requirements, Ashok Engineering Industries can craft the most pertinent solution through our wide product range or a customized product developed just for you. From most simple to extremely challenging requirements, you will find Ashok Engineering Industries solutions working efficiently practically everywhere. In automobile plants, engineering industries, process plants, infrastructure projects (construction, power, metro rail, shipyards, steel, etc.) and in SMEs. Ashok Engineering Industries systems are literally spanning the length and breadth of the nation. Serving thousands of industries and handling millions of tons of load every hour. Are you too facing a lifting and handling challenge in your industry? Do contact us. We sure have something special for you.

DESIGN CAPABILITIES

Our Design and Development team works continuously to maintain the highest product quality and offer our clients the most up to date solutions. Ashok Engineering Industries has always prided itself in being at the forefront in adopting the latest technological advances in cranes and is considered as a pioneer in the field. Constant development is being undertaken with the sole intention of maximizing the value delivered to the customer in terms of lower total cost of ownership, higher reliability, higher safety and faster productivity. The design team is equipped with state-of-the-art facilities. As a result of our pursuance of world-class technology, our equipment are operating flawlessly at diverse locations.

SOLUTION APPROACH

Ashok Engineering Industries is known for providing most appropriate material handling solutions to various industry segments. While recommending a perfect solution, we take into consideration several aspects. This includes a preliminary study of the factory / site, in-depth analysis of existing and planned material handling requirements, production speed, work-flow, plant integration possibilities and environmental aspects. Our wide product range and more than 35 years' experience of thousands of crane installations for a variety of applications allow us to design and recommend a perfect solution. Over the years we have designed and developed hundreds of customized solutions for our clients, be it variations of existing products or completely new products developed from the ground up. It is this capability to develop pertinent solutions that not only take into consideration your existing needs, but also your future requirement and possibilities of expansion that make us proudly stand tall as India's largest industrial cranes manufacturer.

QUALITY POLICY

We strive to provide high quality products of heavy steel, fabrication, engineering & services to our customers that meets & exceeds their requirements. To provide a safe and healthy working environment to all employees as an integral part of business performance remains our constant efforts. We have been recognized as an organization that ensures 100% compliance with existing legislation / regulation while effectively deploying our resources and setting objectives to eliminate / control / minimize rejections / risks during production.

Services:

FABRICATION FACILITY

- Extent of Land : 9600 Sq. ft.
- Extent of Cover Area : Machine Shop 4500 Sq.
- Office 1500 Sq. ft. (1st Floor)
- Connected Power : 81 H.P. Industrial Power
- 32 KVA Welding Power
- Handling Capacity : Up to 5 Ton

SHOP FABRICATION

- Conveyor System & Material Handling
- Tyre Manufacturing Machineries
- Hydraulic And Pneumatic Presses (Rubber Bale Cutter Press)
- Trolley & Storage Pallets
- Pressure Vessels / Columns
- Storage Tanks / Silos
- Piping Spools (CS, SS & Alloy)
- Industrial Steel Structures (Pipe Racks & Pipe Supports Etc.,)
- Furnaces & Ducting
- Shell & Tube Heat Exchangers
- Fired Heaters & Elements

SUCCESS PARTNERS

Ashok Engineering Industries firmly believes in offering the latest and the best products and services to its clients. Our tie-ups with renowned companies allow us to explore advanced technology solutions from world leaders. These solutions together with our domain knowledge, understanding of the local market and infrastructure help our customers to get world class solutions from a trusted partner like Ashok Engineering Industries.
